Dear Hiring Manager,  
Hazel Health

I am writing to express my interest in the Data Scientist position at Hazel Health, a company whose mission to improve access to healthcare for children aligns perfectly with my professional values and aspirations. I am particularly impressed by Hazel Health's dedication to providing equitable health services through innovative school-based telehealth solutions, addressing both mental and physical health needs directly within the school environment.

I have a strong background in data science, having recently completed my Master's in Data Science at Rutgers University. My experience includes four years as a Data Analyst at Deloitte, where I developed and deployed machine learning models, built ETL pipelines, and utilized advanced data analytics to support decision-making processes. My ability to transform complex data into actionable insights would be invaluable in supporting Hazel Health's efforts to optimize its telehealth services and enhance healthcare delivery to K-12 students.

Hazel Health's commitment to using data-driven strategies to improve student health outcomes resonates deeply with me. Working in a dynamic and mission-driven environment like Hazel Health offers an exciting opportunity to grow and collaborate closely with a dedicated team, contributing to impactful solutions that support the health and education of children.

I am eager to bring my analytical skills and passion for data science to Hazel Health and contribute to your team's continued success. I would love the opportunity to discuss how my background aligns with your needs and to explore how I can support your mission.

Thank you for considering my application. I look forward to the possibility of speaking with you soon.

Sincerely,  
Ganesh Raj K
