Ganesh Raj K

New Brunswick, New Jersey

Dear Hiring Manager,

NYC City Government

I am writing to express my interest in the Senior Data Scientist position focused on workers' rights at NYC City Government. I am particularly excited about this opportunity to apply my data science skills to support efforts in ensuring fair labor practices and improving workers' rights. I am currently working as a Data Analyst at Rutgers University Communications and Marketing, and I believe my 4+ years of experience in data analytics, combined with my Master's degree in Data Science, make me well-suited for this role.

In my previous role at Deloitte, I was involved in multiple projects where I developed data models, conducted statistical analyses, and built visualizations to guide strategic decision-making. My experience includes using advanced tools like Python, R, and SQL to analyze large datasets and uncover insights that informed policy recommendations. I have been recognized for my ability to translate complex data into actionable strategies, a skill I am eager to bring to the Workers' Rights Division.

While pursuing my Master's degree at Rutgers University, I focused on data science applications in social policy. I completed projects that involved building predictive models to assess economic trends and develop data-driven strategies to support vulnerable populations. These experiences have prepared me to contribute effectively to your mission of advocating for fair labor practices and protecting workers' rights.

I am passionate about using data science to drive positive social change and am excited about the opportunity to contribute to your team. I look forward to the possibility of discussing how my skills and experiences align with your needs.

Thank you for your time and consideration.

Sincerely,

Ganesh Raj K
